

**Rachael Williams and Redhot
(formerly Deadly)**

Five years ago Deadly was diagnosed with navicular disease. After all kinds of remedial shoeing and medication veterinary advice was that the horse should be destroyed. The owner at the time, Anna Ross, decided to try Cytek shoes. Within weeks the horse was back in full work and competing in dressage competitions again. Five years on he

has had a name change and is still competing and enjoying a sound happy life in Cytek shoes.
